

For 15 years I’ve helped institutions make complex ideas clear, engaging, and accessible. I work across strategy, design, and front-end development, usually inside large groups, where keeping people aligned matters as much as the design itself. I build for the long haul, so each client’s team can run the work on their own.

Experience	2011–present	Sandbox Studio Senior Designer and Strategist Sandbox is a design studio for science and research organizations, including national laboratories, universities, and scientific collaborations. – Lead strategy and design for websites, brands, reports, and campaigns, from discovery through launch and support. – Run content and site audits, stakeholder workshops, and interviews, then turn what we learn into an information architecture to serve project priorities. – Design interfaces, brand systems, print publications, and illustration, and build front ends in HTML, CSS, and JavaScript, working alongside developers on WordPress and Drupal builds. – Set up publishing workflows and editor roles allowing client teams to update their own sites. – Build to WCAG standards and design for accessibility.
		Selected projects
	2016–present	Argonne Leadership Computing Facility Lead print and web design for a leading supercomputing facility, from its annual reports to its brand and website. Designed the 2020 site, built its live machine-status graphics in d3.js, and designed its user documentation system. Active users grew from 40,000 to 151,000 in two years.
	2023–present	2023 P5 Report Designed and developed the online edition of the decadal plan for U.S. particle physics, live for its December 2023 release. The New York Times, Nature, and Science linked to it within a day, and it has drawn 74,879 views since.
	2024–2026	U.S. Fusion Outreach Shaped the site’s information architecture and interface, and designed the Fusion Energy Week identity as a ready-made kit for partners. The audience grew from 13,000 to 31,000 in two years, and partners hosted 149 events.
	2022–2023	NANOGrav Led strategy, design, and a brand refresh for a site launched ahead of the collaboration’s 2023 gravitational-wave announcement. In announcement week, it drew 41,000 visitors from 157 countries, 9 in 10 of them new.
	2008–2011	Freelance Design Designed print, identity, and web work for Chicago clients including Magnani Marketing, EP Theater, and Featherproof Books.
